In the aftermath of taking over of the city by the national guards and bringing in the military equipments

The Supporters of *Shari'ah* assert that the corrupt and tyrannical regime could only be confronted with jihad in order to deter it and repel its oppression

The regime of Ali Saleh didn't give the residents of Rada' a chance to govern their city by the Islamic *Shari'ah* – according to their demand - as the national guards took hold of the city and installed back the corrupted elements to the governmental utilities and public service. They outspread tanks around the castle and masjid al-Aamirya as well as the city's entrances and exits. The national guards also prevented the Supporters of *Shari'ah* from entering the city and then targeted them at Dar al-Najd checkpoint by the city's entrance. The encounter turned into fierce clashes which led to the death of two national guards and left six injured.

The Supporters of *Shari'ah* highlighted the point that the corrupt regime uses force and violence to terrorize people and impose injustice and corruption. Hence, nothing will be of use except a forceful jihad that will deter them and repel their oppression. They said: "We call upon every Muslim to strive for the implementation of *Shari'ah* through any Islamic legitimate means necessary. They should never be silent in the face of corruption. They should stand up to confront the traitors, they should stand as one firmly joined body to hold them back and drive away their falsehood".

Shaykh Tariq Ad-Dhahab - The leader of the Supporters of *Shari'ah* in Rada'a- declared that they have already stated in a perivous statement certain demands, and they are:

The mujahideen welcoming the released prisoners

The ancient Masjid Al-'Aamiry at the centre of the City of Rada'

1. The Implementation of the *Shari'ah* law in the city through an administrative board consisting the righteous and knowledgeable men among the residents, those responsible, those having sound, legitimate, Islamic opinion, those brave and loyal to Allah's *Shari'ah*. This administrative board will be handed over all of the city's public utilities to run the existing state of affairs with regard to security measures as well as directing the judicial authorities in conformity with the Islamic *Shari'ah*.

2. Non-interference with the Supporters of *Shari'ah* in their activities and therefore should be given total freedom in calling to to implement the Islamic *Shari'ah*.

3. The release of fifteen prisoners from the political security prison in Sana'a.

Beside this, a great number of people were witnessed in masjid al-Aamirya backing up the Supporters of *Shari'ah* (during their presence) and announcing their readiness for jihad in Allah's cause and for arbitrating to the Islamic *Shari'ah*.

It is worth mentioning that the demanded committee was at its first stages of formation. However, this latest intervention of the regime's national guards might prove to be its only obstacle.

The demands' of *ash-Shari'ah* Supporters - apart from releasing only 3 prisoners - were hampered by the regime as it sent reinforcement forces to the national guard bases in the region and brought its military vehicles to the city.

The released prisoners

The regime as usual evaded the release of all the prisoners and only released three prisoners, they are: Shaykh Nassaar al-Marsad, Brother Nabil adh-Dhahab and Brother Nassir adh-Dhafry.

Al-Marsad was the most distinguished of the three prisoners who had been imprisoned since 2007. Al-Marsad who hasn't been accused of any crime since then is an example of the injustice and tyranny of the regime against Muslim scholars.

The Houthis secret activities in the city

A number of clashes were reported in the streets of the city. The clashes came due to the killing of one of the Supporters of *Shari'ah* by the hands of some Houthis. The clashes resulted in the killing of a number of the Houthis.

The Amir of the Supporters of *Shari'ah* in al-Baydhah's state said: "The Houthis had had a noticeable present and had also a secret agenda inside the city. This is evident through their holding of high ranked posts in the government while some disguise themselves as members and of the conference party (al-Mu'tamar). Their recruitment to those deluded ones and their spreading of their Shiite perversity, fables and innovations among the Muslims. They are also responsible for releasing penal and vengeance criminals from Rada'a prison with the aim of spreading instability among the tribes in a region known for revenge cases."

al-Aubaly... Rada'a's most famous Sorcerer

Al-Aubaly had been summoned to appear before the judicial committee of *ash-Shari'ah* Supporters to question him for his crime of witchcraft and sorcery. However, while some members of the Supporters of *Shari'ah* went to bring the suspect to the Masjid where he will be investigated, al-Aubaly's associates opened fire on the Supporters of *Shari'ah* killing one of them, "to defend the sorcerer". The encounter ended with the killing of two of the sorcerer's associates.

After the crowded reception, the joy of Zinjibaar's displaced residents wasn't completed

The army of the regime forces Zinjibaar's residents out again under the intensity of bombardment!!

Many of returning residents of Zinjibaar moved away again after a random bombardment using heavy weapons and tanks by the government's forces. This move didn't give the returning residents much time after they entered the city.

The returning residents entering the province's building in Zinjibaar whereas the Amir of Abyan welcomes them

The residents of Waqaar's city together with the Supporters of *Shari'ah* had organized a crowded procession to welcome back the displaced residents of Zinjibaar whom on their part expressed their gratification for the warm reception. The returning residents of Zinjibaar said to our correspondent: "The fact the Supporters of *Shari'ah* welcomed them filled them with great happiness and made them feel secure. They added: " That they want their city to be under the management of the Supporters of *Shari'ah*, so that they could enjoy the blessings of the Islamic *Shari'ah*". The residents have also confirmed: "The occurring damage that is caused to many of their properties was because of Ali Saleh's army which carried out air-strike attacks and used various types of weapons, heavy and medium."

The mujahideen had on their part complied with the ceasefire to make it possible for the residents to return to their city and settle down in it. However, that didn't last because of the army's deliberate escalation of bombardment on the city after the coming back of its displaced residents. Our correspondent in the front of fighting reported that 4 tanks were destroyed within one week as the mujahideen's operations continued to repel of the army's aggression.

Continuing the mujahideen's operations against the Houthis

The killing of a Houthi leader in Ma'rib and four other Houthis in Sa'dah.

Hassan al-Muayid who is one of the leaders of the Houthis was killed in Ma'rib at the hands of the mujahideen during his stay in the governmental institute after an accurate surveillance of his whereabouts.

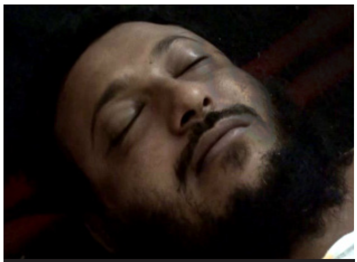

al-Muayid was the first responsible of misleading a number of youths in Ma'rib through calling them to the devious beliefs of the *Rafidah* and joining them to the Houthi's group as many people of Ma'rib reported.
The operation was met with a lot of satisfaction from the honourable tribes of Ma'rib after the Houthi's attempt to spread his followers in their areas to propagate the *Rafidah*'s devious beliefs.

At the same time in Sa'adah, the mujahideen also targeted a motorcar carrying Houthis using a planted bomb. The bomb's detonation led to the killings of four of them, among them was a media director for the Houthis.
These operations come in solidarity with *ahl as-Sunnah* as *ahl as-Sunnah* in Dammaj and Hajjah are being subjected to killings, blockade and displacement by the Houthis.

Abyan bids farewell to the great leader abdul-Mun'im al-Fatahaany along with three of the mujahideen

Following the American airstrikes incursion on the Yemeni soil, one of the mujahideen's leaders in Abyan together with 3 other mujahideen were all martyred. Abdul-Mun'im who got martyred after being affected by his wounds was and his companion targeted in the late hours of *al-Ithneen* day; 30th January of this year. Abdul-Mun'im was buried in his village in Modyah hundreds among Abyan's tribes attended his funeral.

The leader, abdul-Mun'im- may Allah have mercy on him- began journey of jihad with great generosity, sacrifice and assistance as he prepared, equipped and arranged for many youth to set out for jihad in Afghanistan and Iraq. He was also of the earliest to support the jihad in the Arabian Peninsula with his wealth, self and family in an extraordinary way and never stopped giving. It will be injustice not to mention his wise politics and high morals.

The leader abdul-Mun'im Al-Fat'haany (may Allah accept him)

The American airstrike also resulted in the killing of three other mujahideen, they are: Hussein Ali from Shabwah, Ahmad Saleh an-Ni'ran from Modyah and Fatahy al-Maarimy from al-Wadhii', Abyan.

Within the continuous operations to paralyze the capabilities of the hireling intelligence agencies

The killing of the head of the political security prison of Sana'a along with a number of intelligence officers in Aden

Saleh al-Jabry, the head of political security prison got killed in his hometown of Dhamaar at the mujahideen's hands.

One of the mujahideen who came out of the political security prison affirmed that al-Jabry's name was encrypted in the minds of many detainees due to the endless scenes of beating, torture and violent psychology war inside the political prison where a large number of mujahideen are kept in isolation. In precise, during the happenings of 6th Feb. 2011 when al-Jabry came in together with a phalanx of soldiers and brutally tortured some of the mujahideen with electrical shocking devices and wooden cudgels.

In another event, the mujahideen have attacked a bus that carried a number of intelligence officers while in Aden. Those officers appeared to have just finished their foundational training course. The operation had reportedly resulted in few casualties and many injures.
